

LAKE TOBA

the largest volcanic lake in the world

Lake Toba is the largest volcanic lake in the world and the second largest lake in the world after Victoria Lake in Africa. Lake Toba is one out of ten deepest lakes in the world, reaching around 500 metres depth. Samosir Island in the middle of Lake Toba has area of 64.000 hectares or equals to country of Singapore.

Lake Toba was formed by three major eruption in 900.000 years ago, 500.000 years ago, and 75.000 years ago. That caused historical records through the evolution of human, flora and fauna. There are total 45 Geo-Sites within 4 Geo-Area. Those are Porsea Caldera, Haranggaol Caldera, Sibandang Caldera, and Samosir Caldera.

Government of Indonesia established Lake Toba Authority Body, that would have an autoritative right over 500 hectares of land around Lake Toba. The body's area development would include the construction of infrastructure, facility, and the development of key natural and man-made attraction.
