Indicative Project Structure

Description :
 This was part of national railway network located in south of Sumatran island. This network goes through a dense mining, plantation and industry area. The high demand for freight service in this area are not followed by the infrastructure capacity. This project scope was improvement project to increase the capacity of passenger and freight service especially in Lahat Tarahan route. The increase in capacity will be done through the double track improvement

Project Status:
 Project is currently on Outline Business Case phase
