

Project Owner

The Government of Madiun Regency

Project Background

Madiun Regency is a strategic area with a traffic lane connecting Central Java. Since 2014, the Central Government of Madiun Regency has moved from its place of origin in Madiun City to the capital city of Caruban, one of the new economic centers in Madiun Regency. However, the street lighting facilities are still very minimal and many are still using old technology with high maintenance. Therefore, a new modern street lighting system is needed to support economic activities in Madiun.
